

# Driving Performance with Dashboards

**PERFORMANCE dashboards** use Business Intelligence (BI) technologies to help companies define and communicate strategy, examine and adjust the progress of that strategy, and deliver insights and information across an organization. Whether your best option is to buy or build, we can help. We've been helping companies drive performance since 1985.

## TAKE A LOOK AT YOUR BUSINESS

Imagine having a visual representation of all the vital data throughout your organization that you need to make critical day-to-day business decisions. Imagine being able to track business activities and act on them immediately. Dashboards are performance management systems built on top of an integrated infrastructure, allowing users within an organization to measure, monitor, and manage business metrics against goals.

## THE INFO YOU NEED RIGHT ON YOUR DESKTOP

Dashboards can be extremely simple or detailed and complex. As an interface, the dashboard can be customized to provide a view of information and data relevant to each specific user's needs. Whether you are making decisions for an entire organization, or performing tasks that involve a small team, a dashboard can provide critical information at a glance.

## WHAT DO OUR CUSTOMERS SAY?

*"Since Chateaux arrived at Honda almost two years ago, we've seen solid gains in our Business Intelligence results. We always had dashboards in mind, but Chateaux helped us to understand our options and choose the right one for the business. Now, our executives have a more complete picture, from the top to the bottom."*

— Ted Heathcock, Corporate Planning  
Honda Manufacturing of Alabama

## DASHBOARDS BIG AND SMALL

No matter the size of your organization, dashboards can provide a comprehensive view into your data. Dashboards can evolve with your company, as well, being flexible enough to accommodate your organization's growing needs.

## HOW WE CAN HELP

From simple to complex, Chateaux can work with you to create a customized dashboard to suit your business needs. We can help you funnel your data into a dashboard that will measure your past, monitor the present and predict the future of your business.
